Dieselgate Scandal Now #Phonegate Scandal

Volkswagen cars passed diesel emission tests when tested in laboratory conditions, but when the cars were driven on real roads, they emitted far more fumes. In the same way, every one of cell phones tested 'passed' laboratory radiation SAR tests. These phones are legally considered compliant. However, when these phones are tested in the ways that people actually use them in real life, such as in your jeans pocket or bra, the amount of absorbed radiation emissions in our bodies violates the regulatory limits.

Scientists discuss seminal research about cell phones and other health hazards

JACKSON HOLE, WY – Dr. Devra Davis's first grandchild was born in 2004 and by the time he was nine months old, he could grab a cell phone, turn it on and even start a game. At first, Davis was a proud grandparent and reveled at her clever grandson. But then the founder/president of the Environmental Health Trust realized there was a lot about cell phones she didn't know, especially when it came to the impact on young brains.

In her 2007 book The Secret History of the War on

American Academy of Pediatrics Recommendations

- Use text messaging when possible, and use cell phones in speaker mode or with the use of hands-free kits.
- When talking on the cell phone, try holding it an inch or more away from your head.

French National Agency (ANFR) Radiation Testing of 379 Cell Phones

- **2012:** Began testing cell phone at 0 mm.
- **2016:** French Health Agency Report (ANSES) reported 89% of cell phones exceed SAR limits when tested at body contact- 2015 testing.
- **June 1, 2017:** Under pressure, ANFR released data on cell phone models with exact SAR measurements at body contact.

The equivalent US FCC SAR for body contact is higher.

Urgent Regulatory Change Needed

**EUROPEAN
COMMISSION**

June 2016: The New European Directive issued to reduce separation distance in testing to “a few millimeters” is inadequate.

However, We need all cell phones tested at body contact position for all body parts . Testing needs to include children.
